

Lab-5.0.1

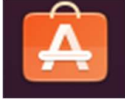

Visual Studio Code Installation

Lab Objectives

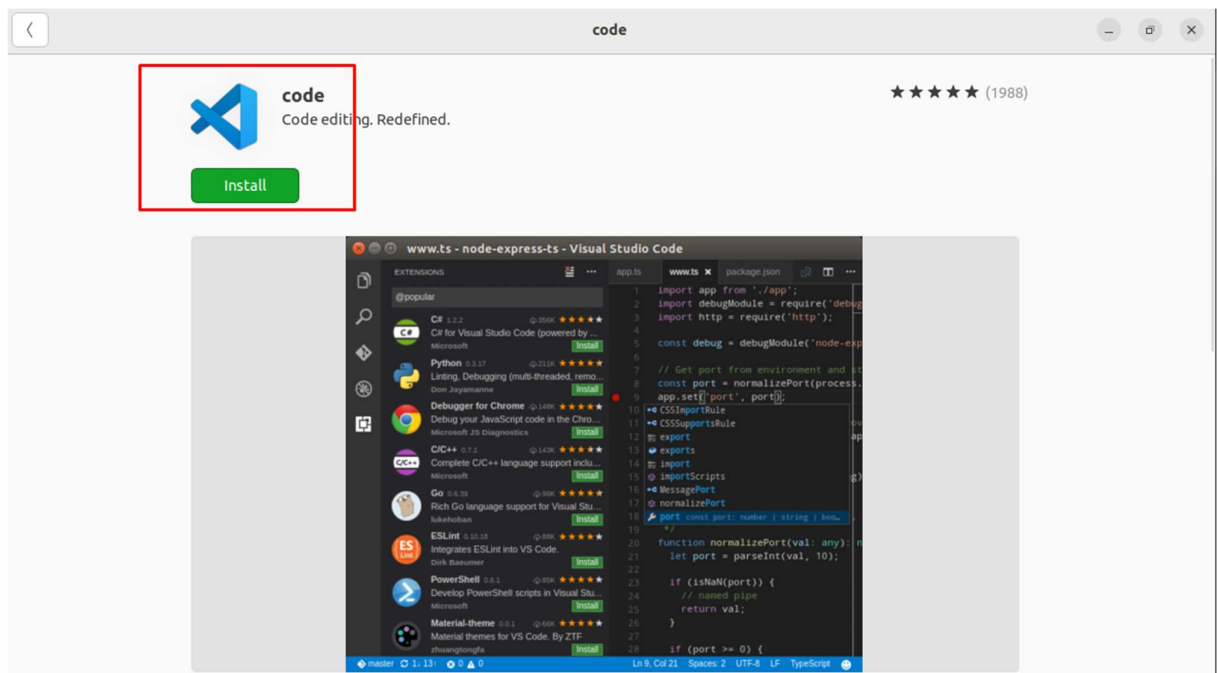

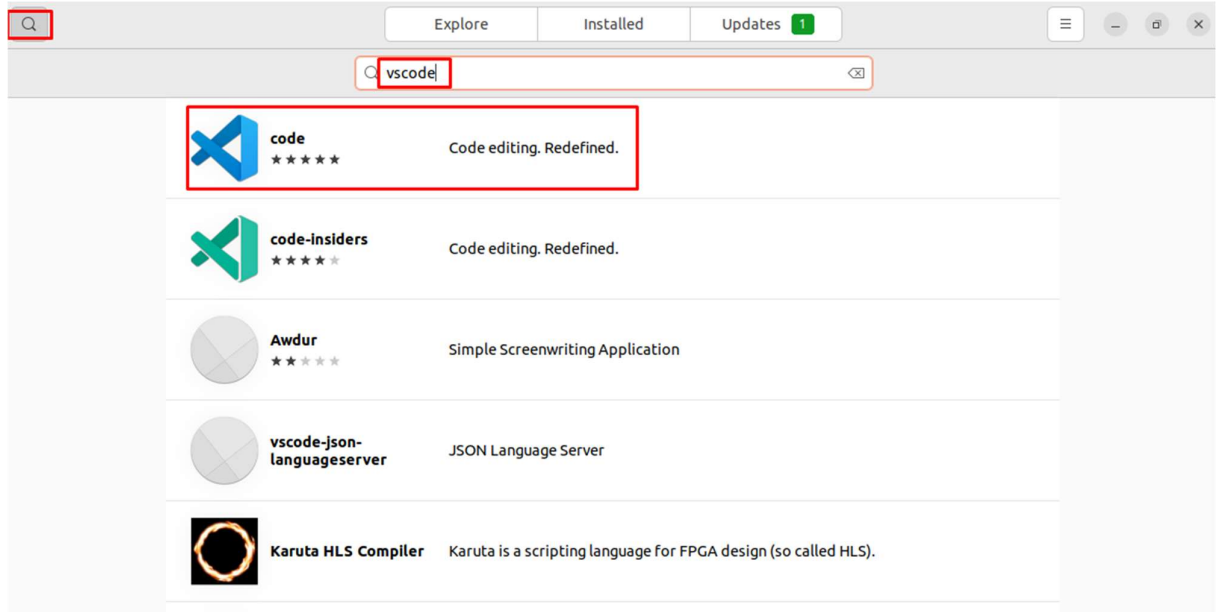

In this lab you are going to install Visual Studio Code which is going to be used during the module.

Tasks

1. Go to the ubuntu store by clicking on the icon:

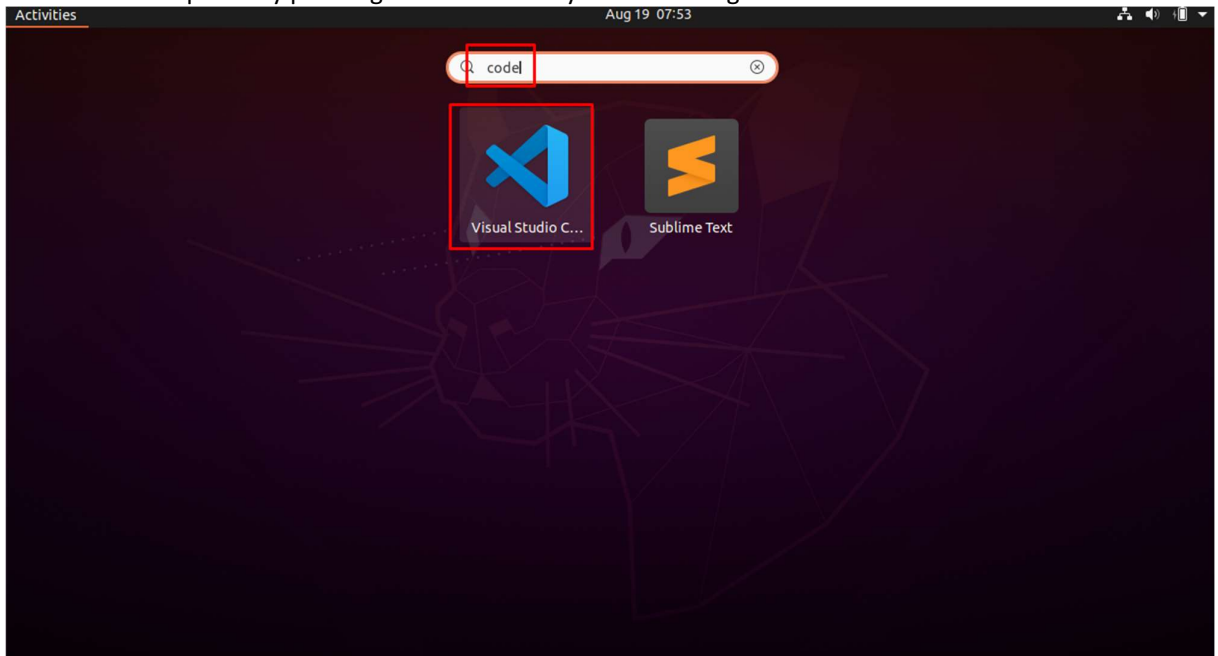

2. Search for “vscode” and install it:

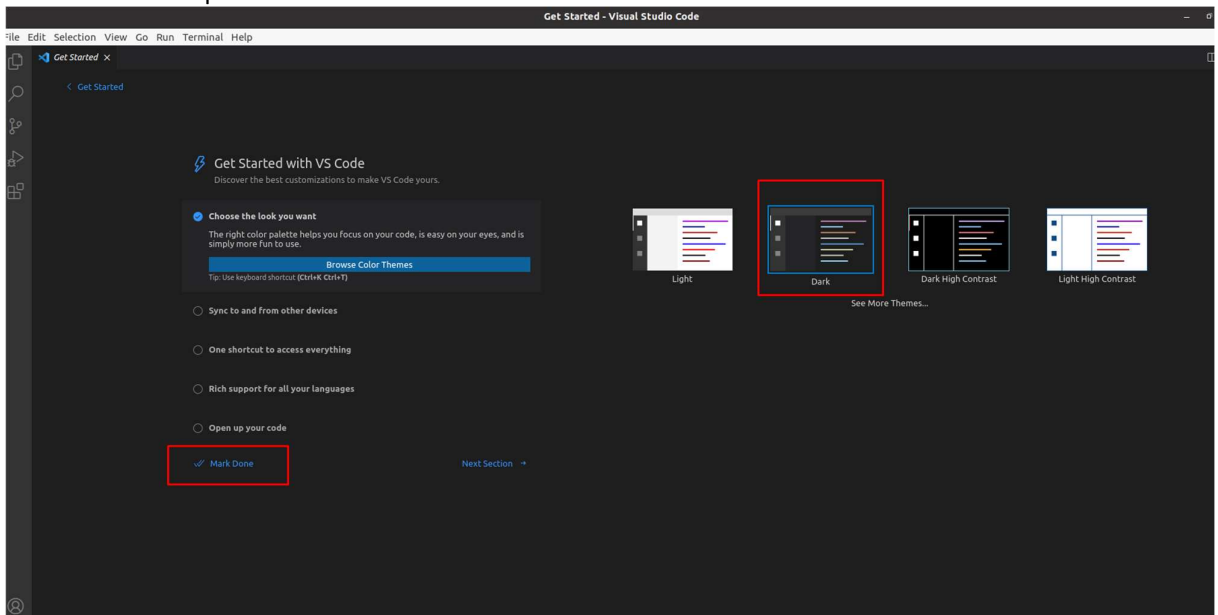

3. It will ask for a password of your user.

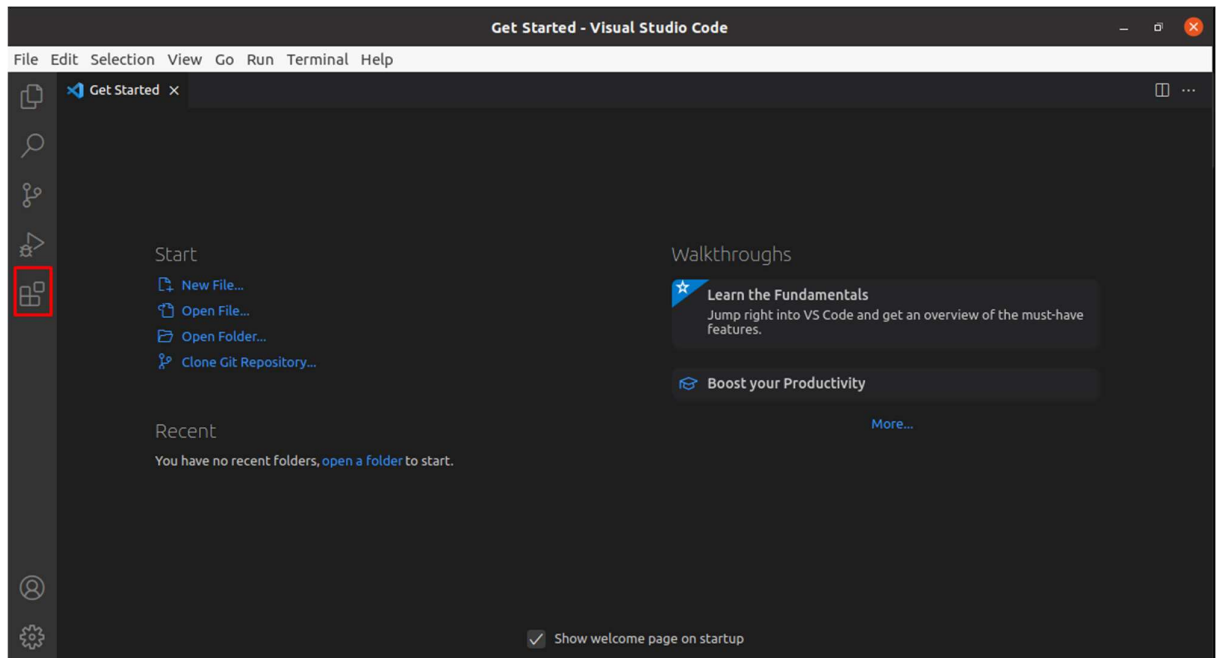

4. Once installed open it by pressing the windows key and searching for “code”:

5. Pick a theme and press “Mark done”

6. Click on extensions:

7. Search for and install python – and you're done!
